*ACF New  
Design 0316...  
A  
PROVEN,  
BALANCED  
BULL!*

*DOB: 9/16/00 Reg #: +13814649  
(#2 REA in the Angus breed; she recently sold for \$260,000 for 1/2 interest)  
Sire: B/R New Design 036*

*Dam: Davis YR Blackbird 558H  
Grand Sire: GAR Precision 1680*

*You know our program is based upon "balanced cattle" and this bull was a major step in continuing the tradition...in his first two calf crops ('03 & '04) the heifer calves averaged 77 lbs. and the bull calves 84 lbs. (no calves over 90 lbs.) His first females are now having calves and they have excellent udders and are good mothers! His 2003 calf crop had adj. WW of 723 on the bulls and 609 for the heifers...and this only as a clean up bull. In 2004 one of his bull calves was a top performer at IBEP and sold to Purdue University beef operation for \$2700. This is a very easy keeping and fleshing bull that is structurally sound, free and easy moving and phenotypically correct.*

*Only 7 bulls (2 in the Spring 2005 Main Summary and 5 in the Supplemental) could equal or exceed his key performance characteristics for WW, YW, SC, U%IMF, UREA. Throw in milk and none do! He has 8 characteristics in the top 25% of the Angus breed: 3% on WW and MK; 4% on UREA; 5% on \$G; 10% on U%IMF, U%RP, and \$B and 25% on \$W...that is real balance in a proven animal that can bring top quality genetics to your herd. Please give us a call.*
